01. SUMMARY

Full Stack Developer with 4+ years of experience building enterprise platforms in production, specializing in Angular on the front end and Laravel on the back end, with deep AWS experience. Built the internal CRM and operations platform Clark Outsourcing runs on -- employee lifecycle, helpdesk ticketing, and Airtable/Zoho automation -- plus a separate payroll system with full Philippine statutory compliance. Most recently brought AI into company workflows through RAG pipelines with Pinecone and Elasticsearch. Full details, live projects, and an AI assistant that answers questions about my work are on my portfolio site (see sidebar).
